Be Ready, Be Prepared

Go-Kits - Examples

Disaster Communications - Are You Prepared?

Do you have water? (Filled Water bottles)

Food and Supplies for at least 72 hours

Could you get on the radio if your power was out?

Can you program a reset radio? (Where's your manual?)

Are you batteries charged in your HT? Do you have a spare?

Can you go operate and deploy if needed (Radio, Antenna, coax and power source ready, food and personal supplies?) in less than 2 hours?

What is a Go-Kit?

An easily accessible kit of gear that can allow you to (deploy?) get on the air quickly.

It's not all just radio gear, there are go-kits for personal supplies and water to consider.

Radio Go-Kits

Here are some examples of what can be in your easily deployed go-kit

HT with charger and spare batteries

Mobile Rig for VHF/UHF with external antenna (mag mount)

Extra Coax

Power Supply and/or 12v battery?

HF Rig and antennas (think about how you would setup the antenna and what might be needed to do that, (ropes, trees. Masts. Tripod etc.)

Laptop or Tablet

Paper and Pencil!!!

What's in your Go-kit?
